

Maintaining corporate brand management is never easy, even if there is only one person in charge of ordering. But what if you have seven or seven hundred different locations that need to order printing, supplies or items? How do you ensure that everyone follows your graphic standards?

With MLI's E-Fillment Solutions™, we create a customized on-line Market Place specific to your company, with pre-set templates for ordering everything from business cards to brochures, banners to coffee mugs, which follow your established guidelines. Each item ordered generates an on-line PDF proof, which must be approved prior to proceeding. Users can view only items relevant to their login, and administration receives the reports which are critical to the supply chain.

E-Fillment Solutions provides access to inventory at your fingertips, 24/7, along with order history and tracking. You control preset reorder points and receive e-mail notification when inventory runs low, so you never run out of important items, On-line shopping carts provide ease of ordering: there's no need for phone calls or fax requests. With our in-house direct mail services, you never have to ship materials to a mail house or fulfillment company again.

Reports can be customized to meet the individual needs of your organization. You can track daily order activity and record which business unit or users order materials throughout the year. Reports are produced with cost accounting methods in place to provide relevant information for all departments. Reports can also be customized to coincide with your organization's structure.
